To prevent the spread of lawlessness in Lee county where troubles have broken out in the region between adverse claimants to land and leases, Governor Stanley requested that U.S. troops be sent there; the state militia having all been mustered into the National army the state is without a military organization, tho there is a bill now pending before the legislature for the creation of home guards or organization for military protection for use when needed. The Federal reply to the Governor's application was to the effect that until conditions reached a certain stage and were beyond the control of local and state authorities no Federal soldiers could be legally sent to the affected district in question.

Lee county authorities denounce the reports of extreme lawless acts and claim they are greatly exaggerated and that troops are not needed. An oil man arriving here from the Irvine field in early part of the week claims that conditions are bad up there.

If one fourth of the increase in land valuations along Boone Way, in four of the south eastern counties of Kentucky, on account of that highway being built thru its territory, was invested in automobiles it would purchase 800 or more which it formed into a motorcade would reach a distance of two and a half miles and if the Ford machines was taken it will fill the road from Mt. Vernon to Brodhead a distance of six miles, with seven divers left over or enough for boys to play games of marbles with, putting five in the "ring" and using two for "taws."

The threatened great drive by the Huns against the Allies on the western front appears to have been more of a bluff than anything else. It appears that the Kaiser has gathered a big force but is fearful of making his "big drive" and is waiting for the attack to be precipitated by the Allies. He, as usual, has been lying when attempting to belittle the American forces.

Now comes forward the Bureau of Fisheries pronouncing edible such sea dwellers as porpoise, whale, small species of shark, mussels and in addition a long string of names new to most of us denizens of sea, air and land. It would appear that few should get hungry if they take Uncle Sams advice. It might be a good idea to "ketch more of these animals."

WHALE meat is being sold in city market at about half the cost of beef. A whale ordinarily furnishes 15,000 pounds of beef to the carcass, equal to that of from twenty to twenty five head of cattle. It is said a whale is not a fish. Now if these animals could be driven overland and up into the mountains, porkless days could be run a week at a stretch.

The Louisville Herald advises the Signal that it's city has an uglier man than our Brodhead champion homely specimen. A number of Rockcastle citizens claims to be from the "show me" state beyond the Mississippi. Now let the Herald man bring out his exhibit or kindly desist in our Brodhead friend such needless scares hereafter.

CANNED Gray fish is being extensively introduced at a cost of about half that of salmon. Grocers should secure supplies for their customers.

In the American army in one cantonment there are 7500 foreign born soldiers, representing 46 nationalities.

MANY Central and other Kentucky counties are handicapped in the way of shortage in labor. Between the coal mines of eastern Kentucky and the high prices paid for labor by the numerous war munition works north of the Ohio river, hundreds of men have been induced to leave Kentucky fields, tho a good number have returned yet a shortage of help exists.

The legislature has enacted a law providing for the payment of men summoned for jury service whether they serve or not, at least for one day.

The highest elevation reached by man into the atmosphere is six and a half miles.

True liberty is the right to do as you please, if you please to do what is right.

A few months ago this farm was purchased by Earl Phillips for \$2000. Mr. Phillips sold it to H. C. Jones for \$2750.00, Mr. Jones sold it to W. J. McQueen for \$3200, and Mr. McQueen sold it before he had time to move to it, and we understand Mr. Lucas refused four thousand dollars for it Wednesday of this week. Mr. McQueen is now located in this city and is on the lookout for a farm and will go to Laurel county in a few days to see if land is too high there to buy, but unless he goes right away and the land goes to some one else, as the farm just mentioned it will be high enough by the time he finds a suitable location. —W. Jones sold his personal property Wednesday and will soon move his family to the west. —H. T. Young, of Mt. Vernon, will offer for public sale the J. E. Woodard property Saturday. He proposes to divide it into several lots, offer them separately and then as a whole. This is very desirable property and will doubtless bring good prices.

W. E. D. Stokes, the man who built more than a thousand houses in New York, owner of the Ansonia Hotel in that city, and proprietor of Patchen Wilkes Stock Farm, near Lexington, advises his friend, the Boone Way Man, as follows: "When Daniel Boone and Kinsman, Henry Miller, owned a large mill near Point Pleasant, Virginia, 1794-1797, they also had a small foundry at which, among other things was made a special kind of heating stove. The stoves were made several inches in thickness and when heated would retain heat for a long time. I am one of these stoves in existence and I am going to make efforts to secure it and have it placed on Boone Way, so people can see it."

A splendid letter from Lieutenant (Dr.) George Frith, was received this week and will appear in our next issue.

There are many positions open for competent young men in Y. M. C. A. work, army work, clerical positions, etc., etc. Many are called but few are chosen. It seems to be about the condition of things in some departments. So many young fellows fail to take advantage of their opportunities to learn and fit themselves to take advantages arising as time passes.

Carefully Treat  
Children's Colds

Neglect of children's colds often lays the foundation of serious lung trouble. On the other hand, it is harmful to continually dose delicate little stomachs with internal medicines or to keep the children always indoors.

Plenty of fresh air in the bedroom and a good application of Vicks' "Vapo-Rub" Salve over the throat and chest at the first sign of trouble, will keep the little chaps free from colds without injuring their digestions. 25c, 50c, or \$1.00.

With our road grading not yet completed thru the county and but a few miles macadamized, land values have increased from one fourth to one third, what will be the limit when the roads are completed? This prediction was made five years ago by the Boone Way Man when he said land values would double in less than three years after the roads are finished. At the present rate of increase that doubled point will be reached even before the completion of the highways. A good number of farm buyers have come and are coming in from other counties and investing every day.

**FORGOT WHAT HE NEEDED**  
From the Republican, Mt. Glad, Ohio: The editor had an interesting experience some time ago, when a young gentleman came to his office and asked for a copy of the Morrow County Republican. He scrutinized it carefully when a copy was handed him, and then said: "Now I know!" "What is it you are looking for," we inquired. "My wife sent me after a bottle of Chamberlain's Cough Remedy, and I forgot the name. I went to several stores and the clerks named over everything in the line on the shelf except Chamberlain's. I'll try again, and I'll never go home without Chamberlain's Cough Remedy." The Republican would suggest to the proprietors of stores, that they post their clerks, and never let them substitute. Customers lose faith in stores where substituting is permitted, to say nothing of the injustice to makers of good goods and the disappointment of customers.
